

SHEARGLIDE® Drawex 835

Heavy-Duty Drawing and Stamping Oil

Description

Shearglide® Drawex 835 is a medium viscosity, heavy-duty drawing and stamping compound designed to eliminate metal to metal contact in difficult forming operations.

Shearglide® Drawex 835 contains lubricity and extreme pressure (EP) additives to provide smooth metal flow and extended tool life. It also provides stain and corrosion resistance. It is readily cleaned from finished parts to avoid downstream concerns.

Shearglide® Drawex 835 is highly additized, thus it can be used as a spike oil to boost other stamping, drawing, or cutting oil performance

Features/Benefits

Used Neat, Requiring no Dilution

High Lubricity Agent Content

High Extreme Pressure Agent Content

Versatile for Many Operations

Non-emulsifying

Physical and Chemical Properties	
Property	Value
Color	Dark Brown
Odor	Sulfur
Sulfur	Active
Chlorine	Yes
Fat	Yes
Viscosity @ 40 °C	~115 cSt
Flashpoint, °F	280+
